

ANDREA MOZZARELLI

Education/Training

1974 Degree in Chemistry, University of Parma.

1984-1985 Fogarty Fellowship at the Laboratory of Chemical Physics, National Institutes of Health, Bethesda, MD, USA, Dr. William. A. Eaton (member of the National Academy of Sciences, USA)

Positions

1975-1980 Research Assistant in Biochemistry, University of Parma

1980-1988 Senior Researcher in Biochemistry, University of Parma

1988-2000 Associate Professor in Biochemistry, University of Parma

2000-present Full Professor in Biochemistry, Department of Pharmacy, University of Parma, Parma, Italy.

1995-2010 Member of the Interdepartmental Measurement Center board, University of Parma

1998-2003 Member of the committee for the PhD Program in Biochemical Sciences, University of Turin and Parma.

2004-present Member of the committee of the Ph.D program in Biochemistry and Molecular Biology, University of Parma

2011-present Coordinator of the Ph.D program in Biochemistry and Molecular Biology, University of Parma

2011- present Member of the Interdipartimental Center Biopharmanet-tec and SITEIA.PARMA, University of Parma, co-funded by Emilia-Romagna

1999-present Founder and Chair with Proff. Donald Abraham and Glen E Kellogg, Institute for Structural Biology and Drug Discovery, VCU, Richmond, USA, of the course on “From structural biology/genomics to drug discovery”, held every other year.

2008 Chairman of the Symposium on “New Challenges in Protein Science: a Symposium in honor of Dr. William A. Eaton”, with the participation of 13 members of the National Academy of Sciences, USA, and Sir Alan Fersht, Parma.

2009 President of the XII International Symposium on Blood Substitutes, Parma.

2010 Member of the Scientific and Organizing Committee of the Symposium Proteine 2010, Parma.

2012 President of XVII Conference on “Oxygen Binding and Sensing Proteins”, Parma.

2013 Chair of the “Alexander Braunstein Memorial Symposium: Enzymes, cofactors, mechanisms”, 38th FEBS Congress, St. Petersburg, Russia.

2014 President of the IV International Cofactors and Coenzymes Meeting, Parma.

2001 - present Member of the Cofactors and Coenzymes Conference Board.

2007- present Member of the International Blood Substitutes Conference Board.

2007 - present Member of the Editorial Board of Current Medicinal Chemistry.

2008 - present Member of the Editorial Board of Biochimica et Biophysica Acta: Protein and Proteomics.

2008 Guest Editor for a Special issue of Biochimica et Biophysica Acta: Protein and Proteomics. on “Hemoglobin-based oxygen carriers as blood substitutes”

2010 Guest Editor for a Special issue of Biochimica et Biophysica Acta: Protein and Proteomics. on “Protein structure and function in the crystalline state: from x-ray crystallography to spectroscopy”.

2012 Guest Editor for a Special issue of Biochimica et Biophysica Acta: Protein and Proteomics. on “Oxygen binding and sensing proteins”

2003 and 2007 Member of the editorial board for Burger's Medicinal Chemistry VI and VII Edition.

Referee of international high impact factor journals for Biochemistry, Biophysics and Medicinal Chemistry.

Member of the Italian Society of Biochemistry and Molecular Biology, and member of the Protein Society (USA).

Member of National Institute of Biostructures and Biosystems

Member of the COST 2010-2014 "Farm animal proteomics" carrying out activities on meat muscle proteomics.

Member of the COST 2011-2015 "Saffronomics" carrying out activities on saffron proteomics.

Research support

1999-2004 Sub-contractor NIH grant on "Hemoglobin as prototype of allosteric proteins", with Prof. Arthur Arnone and Robert Noble.

2006 – 2010 Italian Ministry of University and Research, International Collaborative grants with Prof. Glen Kellogg, Virginia Commonwealth University, Richmond, Virginia, USA, and Prof. Paul F. Cook, University of Oklahoma, Norman, Oklahoma, USA, for the development of inhibitors of selected pyridoxal 5'-phosphate enzymes, that are drug targets, via complementary computational and experimental methods.

1999 – 2010 Italian Ministry of University and Research, PRIN for the determination of the structure, dynamics and catalytic mechanism of pyridoxal 5'-phosphate enzymes.

2003-2005 National Research Council, grant with Prof. Martino Bolognesi and other units for "Functional genomics: structural bases of the evolution and the protecting activity against host defense mechanisms of truncated hemoglobins expressed in unicellular organisms", acting as project coordinator in 2004-2005.

2004-2007 FP6 STREP on "Eurobloodsubstitutes" for the development of a hemoglobin-based oxygen carrier, acting as PI of a participating unit.

2006-2011 Cariparma Foundation grant for biotechnological approaches towards the development of hemoglobin-based oxygen carriers.

2010 University of Parma grant for the development of bioreactors and biosensors exploiting protein encapsulation in silica gels.

2012-2014 Cariplo Foundation grant with Prof. Maria Luisa Gelmi aimed at the development of an innovative user-friendly colorimetric biosensor based on aptamer functionalized nanomaterials for the detection of *Staphylococcus aureus* from different biological sources on the development of novel bacteria biosensors.

2010-2011 Research contract with BioChemfor within a EuroTransBio Project on the identification of novel enzyme substrates for fragrance development.

2009-present Research contracts with CHIESI Pharmaceutics for expression, purification and biochemical characterization of surfactant proteins and their formulation.

2012 Research contract with the Massachusett General Hospital, Harvard Medical School, Boston, for the identification of novel hemoglobin ligands.

Scientific activities

- Elucidation of structure-dynamics-function relationships of hemoglobins exploiting biochemical and biophysical methods, including single crystal polarized absorption microspectrophotometry and fast kinetic techniques, in solution, in silica gels and in the crystalline state. Main collaborations: Dr. William A. Eaton, NIH, Bethesda, USA; Prof. Cristiano Viappiani, University of Parma; Dr.

William Royer, University of Massachusetts, Worcester, USA; Prof. Paola Dominici, University of Verona.

- Characterization of the stability, catalytic mechanism and specificity of pyridoxal phosphate-dependent enzymes, including tryptophan synthase, *O*-acetylserine sulfhydrylase, tryptophanase, kynurenine aminotransferase and serine racemase. Main collaborations: Prof. Paul Cook, University of Oklahoma, Norman, USA; Prof. Robert Phillips, University of Georgia, Athens, USA; Dr. Edith Miles, NIH, Bethesda, USA; Dr. Tatyana Demidkina, Russian Academy of Sciences, Moscow, Russia; Prof. Menico Rizzi, University of Piemonte Orientale.
- Reactivity of glyceraldehyde-3-phosphate dehydrogenase with substrate in solution and in the crystalline state, and identification of inhibitors of the enzyme from *Plasmodium falciparum*. Main collaborations: Dr. Maria Vas, Hungarian Academy of Sciences, Budapest, Hungary; Prof. Carlo de Micheli, University of Milan.
- Investigation of the stability of green fluorescent proteins via single molecule experiments. Collaboration: Prof. Giuseppe Chirico, University of Milan.
- Development of therapeutic agents for hypo-oxygenation pathologies based on modified hemoglobins. Collaborations: Dr Warren Zapol, Massachusett General Hospital, Harvard, USA; Dr. Chris Cooper, University of Essex, Colchester, UK; Prof. Andras Eke, Semmelweis University, Budapest, Hungary.
- *In silico* and *in vitro* screening of compounds aimed at regulating the activities of enzyme associated to neuropathologies and bacterial infection. Collaborations: Dr Pietro Cozzini, University of Parma; Prof. Gabriele Costantino, University of Parma.
- Exploitation of protein immobilization in silica gel to select distinct protein conformations, analyzed by spectroscopic methods, and for the development of bioreactors and biosensors.
- Application of computational methods for the evaluation of the interaction between protein and water molecules, ligands, proteins and DNA, and for the design of protein ligands. Collaborators: Drs. Donald Abraham and Glen Kellogg, Virginia Commonwealth University, Richmond, USA; Dr. Pietro Cozzini, University of Parma.
- Proteomic approaches for the analysis of food products and biological fluids. Collaborations: Prof. André de Almeida, University of Lisboa, Lisboa, Portugal; Prof. Jane Thomas-Oates, University of York, UK; Dr. Roberta Virgili, SSCIA, Parma; Drs. Silvia Catinella and Barbara Pioselli, Chiesi Pharmaceutics.

Invited speakers to national and international conferences, and referee of national and international funding agencies.
